

## ABOUT US

**CHEKKIT** is developed in South Africa. Key personnel have a long track record of developing new technologies for businesses both in small companies and in large multinationals. Our mission is to help organizations answer their most important questions with efficient data collection and analytics.

**CHEKKIT** is the most flexible and cost effective audit, inspection and workflow management solution available. The only limit is your imagination.

Automate workflows, audit and inspection data collection, and reporting to reduce risk and cost. Mobile data collection and reporting made easy. Capture and manage data from the field then share and analyse it across your organisation, for fast and accurate decisions.

## CHEKKIT SOLVES THREE UNIVERSAL PROBLEMS

1. Availability of real-time, reliable and accurate data from the field is a critical factor in planning, decision-making and risk management.
2. Mobilisation of your personnel with real-time information to enhance productivity and compliance.
3. Total control over the inspection process as well as a global overview of your inspection status.

**CHEKKIT** allows you to easily setup you inspection no matter how complex it may be.

With **CHEKKIT**, your audit and inspection data is instantly available for companywide reporting and analysis.

**CHEKKIT** has an action management tool for tracking and closure of corrective actions identified in the audit process. Our powerful escalation feature ensures that non-conformances are timeously addressed thereby putting you in total control.

**CHEKKIT** ensures that non-conformances are rectified and not swept under the carpet as the originator of the non-conformance is the only person able to close the non-conformance giving you peace of mind.

**CHEKKIT** is ideal for managing data and the corrective actions from any audit or inspection process including:

- Workplace safety audits
- Environmental & health & safety assessments
- Quality audits
- Building Inspections
- Vehicle inspections
- Incident reporting
- And many more!

It is so flexible you can use your browser, smartphones and tablets to collect audit data

- Transportation & Maritime
- Facilities management
- Property rentals

## DATA ANALYTICS WITH CHARTS AND IMAGES

Data analytics is a key part of any data collection process. Without the correct tools, you are easily stuck with a large chunk of numbers, words and perhaps some images.

With mobile data collection, we already have the possibility to collect and share data faster than ever between the field teams, decision makers and other stakeholders.

What we truly need is a solution to produce and share key insight. An intelligent system where your own people not only collect data but also find and share the key information you need to react swiftly.

**CHEKKIT** has 4 key tools to help you analyse field data: map, table, images and charts. These tools cover 4 very important parts of data:

1. Geography
2. Numerical and text data
3. Visual information
4. Patterns and trends.

You can Report Incidents whilst on a walk about as well as take a picture upon saving the incident the geo location will automatically be recorded resulting in 100% traceability

Real time data analysis with Pie and Bar charts are available. Create charts based on your organizations own hierarchy and visualize differences between branches. Drill down into details by filtering further based on users and dates.

Charts will help users to find patterns and visualize trends but also gives the ability to share this understanding. This enables an extremely fast way to share timely key metrics with stakeholders.

## AT CHEKKIT, DATA SECURITY IS OUR PRIMARY CONCERN

AT CHEKKIT, THE TRUST AND CONFIDENCE CLIENTS HAVE IN OUR DATA SECURITY MEASURES IS OUR PRIMARY CONCERN. THIS TRUST AND CONFIDENCE IS EARNED THROUGH A DEDICATION TO PROTECTING THE CONFIDENTIALITY, INTEGRITY, AND AVAILABILITY OF CLIENT DATA.

As a cloud-based business, data security is the bedrock of our business and to ensure we meet The highest data security standards, **CHEKKIT** have partnered with reputable ISP's whose infrastructure is designed and managed according to security best practices as well as a variety of security compliance standards.

As a **CHEKKIT** client, you can be assured that your data is protected by some of the most secure computing infrastructures in the world.

Furthermore, **CHEKKIT** makes use of third party providers to conduct background checks on all potential employees and these checks include but are not limited to verifying CV content, qualifications, driver's licenses, criminal records as well as character reference checks.
